

## Discover the Vicone High Performance Rubber Advantage

### Your Engineering Design Support Specialists

At Vicone High Performance Rubber we understand that one-size does not fit all, especially when it comes to designing new products for today's ultra-competitive marketplace. That's why you need a partner that can offer unique solutions and address your customer challenges in creative new ways. A partner that will make you an expert in its products by putting information at your fingertips and doing whatever it can to make sure you impress your customers.

### The partnership advantage

Vicone is that kind of partner. We invite you to visit our website at [www.vicone.ca](http://www.vicone.ca) to discover the high performance rubber Knowledge Well – your one stop resource for rubber extrusions, molded and fabricated parts. It features an interactive material selection tool and conversion engine as well as tolerance tables and compound specification sheets. Of course, our rubber specialists are always on hand to help you verify or design the best possible solution for your needs.

In the past, distributors simply provided fulfillment services, delivering parts to customers when needed. Today, design engineers must be more productive with fewer resources, so it's not just about ordering parts anymore. You need the competitive advantage of a specialized partner like Vicone whose technical expertise and value-added services can smooth the path from concept to manufacturing.

### We're the experts so you don't have to be

*"Engineers and design firms turn to us for product development and design support because they recognize the value of our technical expertise and in-depth knowledge of rubber. Rather than simply fill an order, we will often question and challenge our customer's material selections if we do not think they are the best fit for a particular application."*

**Eric Leclair, President**  
Vicone High Performance Rubber

### How we can help you

By evaluating cost, availability, and performance requirements, Vicone will optimize your material selection. Our strength lies in our ability to combine your creative genius with our own practical, hands-on knowledge and design chain services to ultimately bring better, more successful and profitable products to market.
